## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, drawn to method of making an absorbent article.

Group II, claim(s) 5, drawn to long continuous member.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same corresponding special technical features for the following reasons: Claim 1 is either obvious over or anticipated by Schleinz et al (U.S. 5,458,590). Accordingly, the special technical feature linking the three inventions, patterns printed on a continuous member, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, the restriction is appropriate.
3. A telephone call was made to Joseph Kolasch on November 21, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
